To Whom It May Concern,

The YMCA has a long-standing commitment to promoting health, wellness, and safety for all who walk through our doors. As we strive to provide safe and supportive environments for our community, we continually evaluate products that align with our mission. It is with great enthusiasm that I endorse the Shower Sock™ as an essential product for the fitness and wellbeing marketplace.

We offer locker room and shower facilities as a convenience for our members and the communities we serve. Products like the Shower Sock™, which allows you to wash your feet while wearing, can serve as an additional layer of cleanliness and prevention. The Shower Sock™ offers disposable, anti-bacterial, and anti-fungal protection and also promote a safer, more comfortable experience for users.

This product aligns with our values of prioritizing health and safety while enhancing the wellbeing experience for all fitness club members. With features that protect against infections and treat odors, the Shower Sock™ offers peace of mind to facility operators and users alike. It also addresses broader concerns of public health and safety, and empowers us to focus on our core mission of strengthening community through whole-person health.

The YMCA North believes in leading by example in the fitness community, and we recognize the Shower Sock™ as a practical, affordable, and innovative product that can significantly improve the safety and wellbeing of fitness enthusiasts. We encourage fitness facilities worldwide to consider adopting the Shower Sock™ as a standard feature of their wellness and hospitality offerings.

Warm regards,

Glen Gunderson
President & CEO
YMCA of the North
